# IGP-METALLIC<sup>®</sup>pearl – noble metallic surfaces with cool gloss

## Surfaces become an experience with IGP-METALLIC<sup>®</sup>pearl

Whether mysterious, noble or luxurious: create your own special metallic surfaces. The innovative pigment technology used by IGP-METALLIC<sup>®</sup>pearl makes it possible. Copper, brass, silver or gold shades as well as RAL and NCS colors offer you enormous creative potential. Office furniture, household appliances or other diverse indoor applications provided with a deep, cool shiny metallic surface are guaranteed to be an eye-catcher. The single layer powder coating system with IGP-METALLIC<sup>®</sup>pearl providing the color and protective surface is available in a variety of gloss types and surface structures (see chart with range of products).

## Superior elegance combined with simple application

IGP-METALLIC<sup>®</sup>pearl is based on state-of-the-art effect technology. As far as elegance is concerned IGP-METALLIC<sup>®</sup>pearl makes every wish come true. That applies to the applications as well. Spotless spray patterns, short stoving times as well as identical batches and delivery consistency are only a few of our product advantages. Try out IGP-METALLIC<sup>®</sup>pearl for yourself: We are always happy to provide you with samples and advice on application techniques.

## IGP-METALLIC<sup>®</sup>pearl interior product range

Product quality	Surface	Gloss level
IGP-DURA <sup>®</sup> mix 3302P	Smooth finish	Matt
IGP-DURA <sup>®</sup> mix 3303P	Smooth finish	Matt
IGP-DURA <sup>®</sup> mix 3305P	Smooth finish	Silk matt
IGP-DURA <sup>®</sup> mix 3107P	Smooth finish	Silk gloss
IGP-DURA <sup>®</sup> mix 3109P	Smooth finish	Gloss
IGP-DURA <sup>®</sup> mix 331MP	Fine structure	Matt

### Areas of application

For industrial applications on metallic substrates:

- Office furniture
- Ceiling panels
- Household appliances
- Radiators
- Lights
- Sports equipment

### Color shades

Primarily RAL and NCS color shades. Special custom shades are available by arrangement. The metallic effect depends on the base shade.

### Cleaning recommendations

The elegant metallic gloss brilliance is at its best when surfaces are well cleaned and cared for. The gloss can be preserved longest on non-abrasive cleaned surfaces.

# Innovative pigment technology for fascinating metallic effects

## Specially treated pigments produce intensive reflective feature

Specially treated pearl mica pigments – coated with exclusive metal oxides – have excellent flooding and levelling behaviour, enabling parallel levelling of the mica below the surface. The effect is that the streams of light falling on the surface are reflected and scattered at greater intensity.

## The advantages of IGP-METALLIC®pearl at a glance

### Characteristics of metallic-effect powder varnish

- Homogenous matt or gloss metallic surface finish
- Elegant satin shine
- Closed effect appearance (non-sparkling)
- High optical density, close particle size distribution
- Cool gloss with depth

### Processing

- Short, low stoving times
- Very easy application
- High recycling rates
- No deposits on the coating gun

Based on the processing instructions for each base quality IGP-DURA®mix 31 and IGP-DURA®mix 33.

### Structure

For indoor use single layer powder coating system with IGP-METALLIC®pearl as color- and protective coated surface.

### Surfaces

Flawless spray pattern, smooth finish or with fine structure, cloudless effect distribution, available in a variety of gloss levels.

### Ecology and economy

- No toxic contents
- High recycling rates
- Low energy usage thanks to low stoving temperatures
- Environment-friendly production
- Corrosion-proof

### Safety

- Selected and tested raw materials
- Identical batches and delivery consistency
- Certified work and management systems

### IGP Service

- Application-related consulting
- Customer training
- Individual sampling
